4 Strathallan Estate, 4 Strathallan St, Dunedin

DELIVERY

Depending on your site access, the standard one man delivery is \$190 Dunedin / \$250 (Central Otago, Southland, North to Timaru) and includes getting the spa into place (does not allow for crane hire if needed). With our delivery service, our handover service includes going through with you on how to operate the spa, how to use the chemicals, as well as answering your questions. You are not left to figure everything out on your own.

Owner is responsible for the extra labour required to assist with the unloading of the spa and assist with getting the spa into place. Usually 2-3 people depending on site. Your spa may be tilted onto its side to fit through pathways and gates (1000mm normally required) and allow for any increased height of the spa.

OPTIONAL EXTRAS

Chemical Kit Option

We also offer a Chemical Kit for \$150 which includes Sanitiser, Water Hardener, Ph Down, Alkalinity Up, Test strips, and Cartridge cleaner. This gives you everything you need to get started and will last for quite a while.

Rock-it Cover Lifter – Highly recommended

We also offer the Rockit Coverlifter for \$399 and includes assembly on site. Makes taking the cover on and off a breeze as well as helps extend the life of the cover. 5 year warranty.

WHY BUY FROM SPA POOLS OTAGO

1. Our expert will assist with getting the spa where you will like it placed. We explain how to set up and use the controller as well as how to balance the chemicals and answer your questions.
2. Spa Pools Otago has its own in-house service person and we don't rely on a third party which can be hard to book.
3. Our warranties include Parts and Labour. Where as other companies may only include Labour for the first year and after that the cost is up to you and would most likely be done through a third party, which will be more costly.
4. All spas have a minimum 3kw heater. Anything less and the heater will struggle to keep spa at temperature and not suitable for the Southern climate.
5. We don't use the "Potty Skimmer" filter system as we find this method outdated and noisy. All of our spas use a proper filter system. Most important, we are locally owned and operated and we are **here** to help
